SUMMARY

Mechanical Robotics graduate with hands-on experience in mechanical design, automation systems, and product development. Skilled in CATIA V5, AutoCAD, and SolidWorks with practical exposure to EV charging enclosure design, automation machine development, robotic systems, and biomedical device modeling. Experienced in 3D modeling, assembly design, motion simulation, CNC manufacturing, and prototype development using 3D printing technologies. Passionate about developing innovative mechanical and automation solutions for industrial applications.

EXPERIENCE

DJT EV POWERTECH, Design Engineer 05/2025 – Present

Visakhapatnam, Andhra Pradesh

- Designed manufacturable EV charging machine enclosures using CATIA V5, improving component integration and simplifying assembly processes.
- Developed and simulated automation machine and Montratec system models for QFN packaging applications, enhancing design accuracy and motion validation.
- Created AutoCAD layout and site planning drawings for machine installations, optimizing equipment placement and workspace utilization.

Hunumax Technologies, Intern

12/2024 – 03/2025

Visakhapatnam, Andhra Pradesh

- Designed an articulating laparoscopic instrument using CATIA V5, improving joint mobility and ergonomic handling for minimally invasive applications.
- Optimized CAD models for manufacturability and 3D printing, enabling functional prototype development and dimensional verification.

Dreambots, Intern

04/2024 – 05/2024

Visakhapatnam, Andhra Pradesh

- Designed a collaborative robot (cobot) structure using CATIA V5, focusing on modular joint design and safe human-robot interaction.
- Performed basic kinematic and workspace analysis to validate robot motion and operational reach for industrial applications.

EDUCATION

Gayatri Vidya Parishad College of Engineering,

11/2021 – 05/2025

Bachelor of Technology in Mechanical Robotics

Visakhapatnam, Andhra Pradesh

Sri Chaitanya Junior College, Intermediate

06/2019 – 05/2021

Visakhapatnam, Andhra Pradesh

Sri Chaitanya Techno School, 10th

06/2018 – 03/2019

Visakhapatnam, Andhra Pradesh

SKILLS

Catia V5 | AutoCAD | SolidWorks | Master CAM | 3D Printing | Python | RoboAnalyzer |
CNC Programming

TRAINING / COURSES

CNC Training Program

Python Programming Course

KEY ACHIEVEMENTS

CNC Training Program - APSSDC & Siemens

- Acquired skills in CNC programming and operation, contributing to your technical manufacturing knowledge.

Python Programming Course

- Gained foundational to intermediate proficiency in Python, supporting further work in simulation, automation, and software-driven projects.

PROJECTS

3DOF RPR Robot Analysis

- Performed forward and inverse kinematic analysis of a 3DOF RPR robot using MATLAB Simulink to evaluate robotic motion behavior and workspace reachability.

Dishwasher Design

- Developed a dishwasher assembly model using CATIA V5 and created motion animations in Blender to visualize operational mechanisms.

Drone Design and Development using Betaflight Controller

- Designed and assembled drones using Betaflight controllers, improving component integration and frame-level mechanical stability.

INTERESTS

Basketball Captain — Captain of MRB basketball team during the Annual Cup
